

“We provide Digital skills
for the new Millennium”

Course Summary

This one-day training course was created for those who wish to enhance knowledge about digital media. The DV revolution has created the ability to create high quality video and multimedia on a desktop at fraction of its former cost. This presentation will cover the how to choose the right tools needed to produce video using the new digital cameras and computer based editing systems. Topics covered will include the software tools currently available and hardware requirements to consider for producing digital video. What is the difference between a CD-ROM and a DVD along with a look at what the future holds for the digital media environment

Prerequisites

Because of the amount of material we cover in class, we do Require students to be comfortable using a mouse, opening and saving files, and the general operations of computers. While we will make every reasonable effort to help, students with insufficient skills may be required to observe the class lessons or do their best to keep up without slowing down the rest of the class.

What You Will Learn

- Codecs and compression
- Streaming media formats
- Tape Formats
- Analog to Digital conversions
- Animations and computer graphics
- Rich Media formats
- Uses for digital media
- Hardware requirements
- CD-ROM, DVD, CD-XA
- MPG 1,2 and 4 MP3
- SDI, AES-EBU, SPDIF, TDIF and other Audio Formats
- What is IEEE-1394
