Video is one of the most powerful methods of communication. This 16 hour course for novice digital video editors opens the doorway to video communications by helping them recognize terms and concepts surrounding digital editing and become familiar with the interface and tools of Premiere and be able to cut projects using Premiere. The course covers the basic techniques you need to become proficient in combining video, animation, still images, and graphics into digital movies for videotape, CD-ROM, and interactive multimedia applications.

You Will Learn:

How to Capture Footage

Creating Transitions

Importing Animations

Three Point Editing

Importing Audio

Using Filters

Masks and Alpha Channels

Layer Techniques

Recording to Tape

Exporting to Web

Adding Titles

Working with Bins
