

Final Cut Studio “Introduction” 5 day course \$1195

In this five day hands on course HDMTC introduces students to the primary feature set and basic interface of Final Cut Pro, Live Type, Soundtrack Pro, Motion, DVD Studio Pro and the Compressor. In this course, you learn to perform basic editing functions while familiarizing yourself with the user interface. Topics include basic setup, adjusting and customizing preferences and settings, capturing video and audio, various editing and trimming techniques, ripple, roll, slip and slide tools, advanced type features, audio editing and audio creation, motion graphics, finishing and final output. This five day course incorporates the entire studio in a week long course. Enabling users to see the transitions between the separate applications and create a project from start to finish. Individual application courses are also available.
