

Basics of Lighting Workshop – 1 Day Class - \$195

This one-day workshop covers the basic vocabulary and practice of lighting for video through demonstrations, screenings, and exercises. We will focus on the underlying principles of lighting while finding solutions for the practical problems, including those inherent in the low-budget production. Through exercises we will set up different lighting schemes, including lighting for interviews, product shots, and chroma keying. Instrument choices, power, color, temperature, continuity, high and low key lighting, and safety procedures will all be addressed. You are encouraged to bring your own equipment to develop strategies for real world situations.

What you will learn in this 1 Day Class:

- Three Point Lighting
- Studio and Location Lighting
- Lighting for Interviews
- Common Terminology
- Product Lighting
- Chroma Key Lighting
- High key and Low Key Lighting
- Color Temperature
- Umbrellas and Gels
- Reflectors and Diffusers
- Outdoor Lighting Tips
- Power and Safety
- Choosing and Building a Lighting Kit
