

VT4 Video Toaster Basic Training 2 Day \$495

What is VT[4] LIVE!

NewTek VT[4][™] is an Integrated Production Suite that is the culmination of years of planning and engineering. The Emmy®-winning company that created desktop video and defines the cutting-edge in production software, brings you the solution you need to meet your production goals with more power, flexibility and affordability than you ever dreamed possible.

What VT[4] Offers

VT[4] offers live switching and web streaming, real-time keying, titling, the world's fastest editing, 2D video painting, 3D modeling and animation. All of this is tightly integrated with everything you need for production, post-production, and graphics. VT[4] delivers all of this, plus unsurpassed video quality with uncompressed component, digital and analogue video with four-channel audio.

Who Benefits from VT[4]?

VT[4] is designed for the video producer that wants to expand their services without breaking the bank. VT[4] will give the power, flexibility and functionality of a system costing more than THREE times more! Whether the project calls for a live CEO message integrated with pre-edited segments or a complex edit for broadcast television, VT[4] gives you all of the tools necessary to complete your next award winning project.

The Video Toaster is a powerful frontline tool to any production.

Live Production, Public Access, Religious Broadcast, Government Video, Education, Broadcast, Corporate Video, Event Video, Visual Effects, Motion Graphics and more. The Solutions are endless the tools are seamless the power is outrageous. HDMTC not only builds these systems we train on them. In this 2 day basic training edition HDMTC will walk you through the production cycle with the Video Toaster.
